

Packaging Controllers

Model no.: GM8804C-2

Description:

The GM8804C-2 is one of our core products and the industry standard for packaging controllers in China, dominating the market with over 50% market share, and the go-to product in grain, chemical, and fertilizer industries. With over 10 years of experience in designing packaging controllers for industries, we have fine tuned the software for all packaging related needs and processes and while holding patents to key technologies, so our customers in China and worldwide trust us when it comes to their packaging controller needs.

Key Features:

- CE approved
- Suitable for all packaging applications with or without a material hopper
- System self diagnostics for I/O ports to simplify installation and maintenance
- 20 I/O control (8 inputs and 12 outputs)
- Perfect balance between speed and precision with automatic three-speed feeding control
- Advanced free fall compensation algorithm for extremely precise result every time
- Smart calibration without weights
- 20 recipes can be stored for different weighing capacity
- Patent pending two-layer advanced digital filtering algorithm
- Two serial communication ports to connect with computer, printer and/or a second display, Support ModBus protocol
