

# Batching Controllers

## Model no.: GM8804C-A6

### Description:

The GM8804C-A6 is an integrated and powerful batching controller that controls up to 6 type of material batching, which is another innovation from client needs, as it offers a better value solution for 6 materials batching by using a single indicator. This product has been trusted by hundreds of customers world wide while offering a wide range of communication ports for all kinds of applications.

### Key Features:

- CE compliant
- 20 I/O control ports (8 inputs / 12 outputs)
- Perfect balance between speed and precision with automatic three-speed feeding control
- Smart calibration without weights
- Storing up to 40 recipes for different batching capacity
- Patent pending two-layer advanced digital filtering algorithm
- Advanced free fall compensation algorithm for extremely precise result every time
- Two serial communication ports to connect with computer, printer and/or a second display
- Controls up to 6 kinds material batching process
