

Liquid Filling Controller

Model no.: GM8804C-6

Description:

The GM8804C-6 is customized liquid filling controller with many key technologies such as injector motion control, and bottle knock over detection, and liquid weight offset. This controller is one of the few indicators on the market specially designed for this applications and offers the best combination of performance and value.

Key Features:

- CE compliant
- 20 I/O control ports (8 inputs / 12 outputs)
- Advanced liquid injector motion control for best performance
- Bottle knock-over protection to ensure operation when accidents happen
- Gross and net filling modes
- Selectable 3 speed filling
- Smart calibration without weights
- Patent pending two-layer advanced digital filtering algorithm
- Two serial communication ports to connect with computer, printer and/or a second display
